

Project Design Phase
Proposed Solution Template

Date	07 July 2026
Team ID	
Project Name	Q cab – Online Cab Booking Application
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Booking a reliable cab at short notice is unpredictable – customers face long wait times, hidden/surge fares, unverified drivers, and safety concerns, especially at night or in less-served areas. Existing options (street taxis, autos, some aggregator apps) don't consistently solve this in Tier-2/Tier-3 cities.
2.	Idea / Solution description	Q cab is an online cab booking application that connects riders with nearby verified drivers in real time. Users can instantly see an upfront fare estimate, book a ride, track the driver's live location, and pay digitally or by cash, all from a single app.
3.	Novelty / Uniqueness	Built-in SOS/safety button with live ride sharing to trusted contacts, fully transparent upfront pricing with no surprise surge fares, and an optimized nearest-driver matching algorithm that cuts wait times, especially in smaller cities that larger aggregators underserve.
4.	Social Impact / Customer Satisfaction	Improves rider safety (especially for women and late-night travelers) through driver verification and SOS tracking, reduces commute stress with reliable on-time pickups, and creates flexible earning opportunities for local drivers, boosting customer trust and satisfaction.
5.	Business Model (Revenue Model)	Commission-based revenue on each completed ride, subscription plans for frequent riders/corporate accounts, in-app advertising, and premium ride categories (e.g., outstation, rentals) as additional revenue streams.
6.	Scalability of the Solution	Cloud-based backend allows easy expansion to new cities and vehicle types (bikes, autos, outstation cabs); the modular driver-matching engine can scale to handle growing ride volume, and the platform can later add services like parcel delivery or intercity travel.
