

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	07 July 2026
Team ID	
Project Name	Qcab – Online Cab Booking Application
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through the registration form (name, email, password)
FR-2	User Login	Login with email and password Separate Admin login
FR-3	Cab Booking	Search and book a cab by entering pickup and drop locations Select a car / car type Fare calculation and driver assignment
FR-4	Booking Management	View My Bookings history (car, driver, pickup, drop, fare and date)
FR-5	Cab Management (Admin)	Add a new cab using the Add Car form Edit or delete existing cabs View the car list
FR-6	User Management (Admin)	View registered users Edit or delete a user
FR-7	Dashboard & Reports (Admin)	View system totals (users, cabs, bookings) View recent cabs and system summary

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The interface is simple and intuitive, with clear navigation (Home, Book Cab, My Booking) so users can register, book a cab and view bookings with minimal effort.
NFR-2	Security	Passwords are stored securely and access is role-based; only authenticated admins can manage users and cabs.
NFR-3	Reliability	Bookings, fares and records are stored consistently in the database so data is not lost and the same information is shown on every visit.

NFR-4	Performance	Pages such as booking, car list and the dashboard load quickly and respond to user actions without noticeable delay.
NFR-5	Availability	The web application is hosted so that it is available to users and admins whenever required, with minimal downtime.
NFR-6	Scalability	The system can handle a growing number of users, cabs and bookings without a drop in performance.
